## Race and Ethnicity Information

Federal agencies have been working to implement regulations regarding the distinction between race and ethnicity. The change will allow individuals the opportunity to select multiple races to more fully describe their heritage. In addition, education data will be consistent with the Census data and other national data sets (the Department of Education is among the last federal agencies to finalize the adoption of the new requirements).

The Federal regulations specifically address how the data will be collected by schools and districts. Schools and districts must use a two-part question—both parts of which must be answered – to collect race and ethnicity information from students and staff members. If anyone chooses not to provide such information, schools and districts are required to provide an answer on one's behalf.

In order to comply with federal reporting requirements, Paola USD #368 is requiring all students to identify their race and ethnicity information using this enrollment form.

Please feel free to contact your child's school if you have any questions or concerns.

Thank you
